

Tribest® Greenstar® Elite

The Only Juicing System that offers **Complete Mastication**

Whether you are new to juicing or an old hand, the Tribest Greenstar Elite Jumbo Twin-Gear Juicer is the perfect machine for you. With a design inspired by nature's own masticating system, human teeth, Greenstar Elite's jumbo twin gears perfectly mimic the way that your own teeth break down food. The juicer does all the work so that you can take in all the nutrients and enzymes without wasting any energy of your own.

While there are multiple products that claim to be masticating juicers, they usually lack key features of the complete mastication process, which are the functions of slicing and cutting. The Greenstar Elite with its patented Jumbo Twin Gears performs complete mastication incorporating both slicing and cutting actions, which mirror the functions of your incisors and canines in human mastication system. These processes portion produce into smaller pieces for easy juicing and cut stringy vegetables down for trouble-free processing and ejection

(preventing produce from both tangling the gears as well as jamming up the pulp ejection system). Many of the aforementioned juicers only have a mastication system with a singular pressing stage. On the other hand, the Greenstar Elite not only utilizes the complete three stages of mastication (slicing, cutting, and pressing) but also adds a new mixing stage. In the mixing stage, the broken down produce are agitated against themselves allowing for the various nutrients from different produce to interact and activate, thereby increasing the nutritional value of the juice.* The process of complete mastication combined with the new mixing stage not only ensures that every drop of juice is extracted from the produce, but that it will be as nutrient and enzyme dense as possible.

With its list of features and innovative design, the Tribest Greenstar Elite offers unprecedented versatility not only in what you can juice but what you can create in your kitchen!

Revolutionary Technology Combined with Innovative Design to Produce the Tribest Greenstar Elite

There are numerous juicers on the market attempting to convince you that they are more technologically advanced and superior to the Greenstar Juicer. However, Greenstar remains the best twin gear juicer due to its **5 revolutionary features including the complete mastication and some patented features:**

- 

1 Pocket Recesses: In order to reduce overall strain on the motor and extend the Greenstar's operating life, the teeth of the Twin Gears were designed with special pocket recesses to process harder vegetables more efficiently and easily.
- 

2 Cutting Points: The Greenstar's Twin Gears feature special cutting points on each of the gears, allowing it to extract juice more efficiently and to handle sinewy vegetables like celery without getting tangled or clogged.
- 

3 Pressure Adjusting Mechanism: Greenstar allows you to easily adjust the amount of pressure that is exerted inside the juicing chamber in order to effectively handle a wider variety of produce without jamming or clogging.
- 

4 Nylon Safety Buffer: Unlike ordinary dual-gear juicers, Greenstar's Twin Gears feature a nylon safety buffer to prevent steel shavings from inadvertently entering your juice by keeping the stainless-steel gears separated by a margin of 4/1000 of an inch at all times during operation.
- 

5 Exclusive Bioceramic & Magnetic Technology: The bioceramic and magnetic technology found only in Greenstar yields juice of exceptional nutritional quality and delays oxidation – allowing your juice to remain fresh longer.

Diagram of Human Teeth

Teeth of Twin Gears

Pocket Recesses and Cutting Points

Action	Human Teeth	Teeth of Twin Gear
Total # of Teeth:	32 (Adult)	24
A. Slicing:	8 (Incisors)	24 (Pocket Recess)
B. Cutting:	4 (Canines)	48 (Cutting Points)
C. Triturating:	20 (Premolars and molars)	24 (Teeth Base)
Masticating Teeth	100-120 per minute	110 RPM

FEATURES

Higher Yields Designed to maximize the yield and nutritional value of your juice, Advanced Heavy Duty Jumbo Twin Gears, with the same magnetic and bio-ceramic technology as the original twin gears, extend the juicing process from two to three stages - crushing, mixing, and pressing.

Added Safety Greenstar Elite prevents injury by eliminating your chances of interacting with moving parts by including a safety switch system attached to the safety hood, which disables operation when the hood is removed.

Easy Clean Up By combining parts through the new sleek design, there are fewer parts, which means there is less to clean. Additionally, the included safety hood can be used as a basket to cradle the juicing parts after cleaning providing you with storage space for drying without taking up any additional space on the counter.

Locking Mechanism A stationary latching system, one snap step offers optimum convenience and an easier way to assemble and disassemble the machine.

Sleek Design The new, modern, lightweight, streamlined look matches to any kitchen counter complimenting your kitchen style and design.

Easy Grip Outlet Adjusting Knob The knob has been re-designed to include easy grip ridges so you can easily grasp, turn and manually control the pressure inside the machine quickly so you can juice a wider variety of fruits and vegetables of different consistencies.

Carrying Handle Designed to add convenience making it easier for you to move your machine.

Increased Versatility By adding the mixing stage in between the crushing and pressing stages, juicing soft fruits has now become much easier and more effective.
